物理实验报告 文本 代码

产品经理

## 实质是保存多个备份版本

## 命令 克隆git库 Git clone

```
[allen@localhost c]$ git clone https://gitee.com/allen9012/linux.git
Cloning into 'linux'..

[allen@localhost c]$ ll

drwxrwxr-x. 3 allen allen 73 Sep 15 06:34 linux
amp]$ git status
看那些添加那些没有 *的意思是没有添加的都添加上
 [whb@VM-0-3-centos training-camp]$ git add *
-m很重要不能乱写
p]$ git commit -m "这是我的第一次提交,完成进度条代码"
推送
/git push
看日志信息
]$ git log
```

[whb@VM-0-3-centos training-camp] git clone/git status/git add/git commit -m "" / git push | git clone/git status/git add/git commit -m "" / git push | git clone/git status/git add/git commit -m "" / git push | git clone/git status/git add/git commit -m "" / git push | git clone/git status/git add/git commit -m "" / git push | git clone/git status/git add/git commit -m "" / git push | git clone/git status/git add/git commit -m "" / git push | git clone/git status/git add/git commit -m "" / git push | git clone/git status/git add/git commit -m "" / git push | git clone/git status/git add/git commit -m "" / git push | git clone/git status/git add/git commit -m "" / git push | git clone/git status/git add/git commit -m "" / git push | git clone/git status/git add/git commit -m "" / git push | git clone/git status/git add/git commit -m "" / git push | git clone/git status/git add/git commit -m "" / git push | git clone/git status/git add/git commit -m "" / git push | git clone/git status/git add/git commit -m "" / git push | git clone/git status/git add/git commit -m "" / git push | git clone/git status/git add/git commit -m "" / git push | git clone/git status/git add/git commit -m "" / git push | git clone/git status/git st

git 当成一个百度云盘在用~ 进度条 vs git git 分支管理,多人协作

## 一种复制到库里的方法

aining-camp]\$ cp ../\*.c .
aining-camp]\$ cp ../\*.h .
aining-camp]\$ cp ../Makefile .

注意不能忘记.
